Sure Cure For
'Pin-Fusion'!

intake holes near the floor, and then drafts the air through the blind and exhausts human scents 30 feet off the ground, acting almost like a chimney. If you want to spend more time hunting and less time building and maintaining a homemade wooden blind, check out the Deluxe Blind.

Outfitter Blind: The Outfitter Blind has features every hunter expects from a blind. It is portable, maintenance-free, and made from a durable polyethylene shell. It can be used on the ground or atop an elevated Quadpod. It also has gun rests, four large sliding Plexiglas windows for a 360-degree advantage, four eye-level vision windows that allow viewing when standing up, and a pressure-treated plywood floor with carpeting.

SOUTH TEXAS TRIPODS INC.

10' Tripod: For hunters who don't always have trees in the right spot, the tripod from South Texas Tripods Inc. offers solutions. In less than 30 seconds, a hunter can take down the stand, load it onto his shoulder, and quietly move to a better spot. This stand features a sturdy shooting rail, but it is easily removed for bowhunting.

South Texas Tripods Inc. - 10' Tripod

Summit - Goliath

SUMMIT TREESTANDS

Goliath: This full-featured stand for larger hunters has a weight rating of 350 pounds. The Goliath features a larger top portion that gives bigger hunters more room. The stand comes standard with a four-point full-body harness from Seat-O-The-Pants, and a new backpack strap design that adjusts to very large hunters.

TREE-LOUNGE

Tree-Lounge: This new SuperFlauge version of the venerable climber is 20 percent lighter, weighing just 19.4 pounds. The redesigned Tree-Lounge climber also offers more comfort, safety and versatility than previous models. You can hunt from the Tree-Lounge longer and customize it with dozens of accessories, many of which come in SuperFlauge.

TROPHYLINE

Green's Tree Saddle: The Tree Saddle enables you to hunt from forked trees, leaning trees and trees with overlapping limbs. The Tree Saddle weighs only 6 pounds and is made of leather and nylon webbing. You wear the Tree Saddle rather than carry it, which leaves your hands free to carry your bow or gun to your tree. With the Tree Saddle,

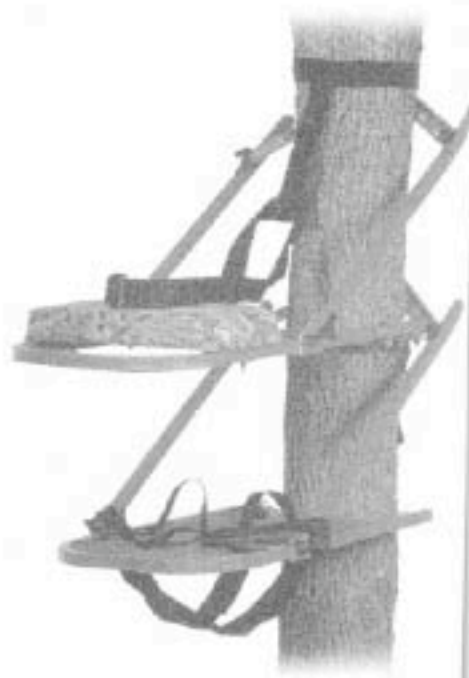

you can safely hunt the perimeter and shoot 360 degrees at any angle.

USL OUTDOOR PRODUCTS INC.

Bear River's Pro Hunter: The Pro Hunter fixed-position stand fits virtually any tree, no matter how crooked. The lightweight, tubular construction features a built-in footrest that you'll appreciate during a long day in the stand.

Remington's Classic Climber: This durable, high-performance stand is designed for those who demand a closed front. Its rugged steel construction provides hunters with maximum stability, and its nonglare, powder-coated finish blends naturally into all settings. The Classic Climber features a comfortable, dual-layered seat that eliminates pinching, and its self-adjusting stirrups fit any-sized boot with one easy pull.

Warren and Sweat's Master Climber: This steel-construction stand provides maximum durability and light weight, and its nonglare powder-coated finish guarantees years of use. The two-inch padded seat allows hunters to face the tree or face away from it.
